

Peninsula Computer Solutions is offering a Member 2 Member discount to all Peninsula Chamber members. They're offering a savings of 33% on network device remote monitoring, management, and maintenance at a monthly charge of \$19.99 per endpoint/unit.

What does PCS offer?

- An IT department or IT department supplement without the overhead
- Monitoring of all network devices, computer desktops, laptops, servers, and most operating systems, including the internet of things and associated devices
- Security protection, monitoring, and automatic intervention across your network devices, including ransomware
- Automatic intervention and correction of hundreds of IT-related issues
- Proactive computer maintenance regularly
- Free phone support
- Cost-plus hardware & software purchases from select partners

What it does for you.

- **Drive employee productivity:** Users spend less time on IT issues because we proactively identify issues before they impact end-users.
- **Bolster asset productivity:** Extend asset life and reduce computer downtime by keeping assets up-to-date and working properly.
- **Improve IT management:** Better management of computers through monitoring, automation, and powerful issue resolution tools so you can focus on your core business.
- **Drive revenue and profitability:** Our Integrated tools and more efficient service delivery drive down costs while more effective delivery keeps your company focused on growth instead of IT.
